## SIMPLIFYING DAILY LIVING

Make life easier with unique products that keep items in place during daily activities.

[myGRIPsolutions.com](https://myGRIPsolutions.com)

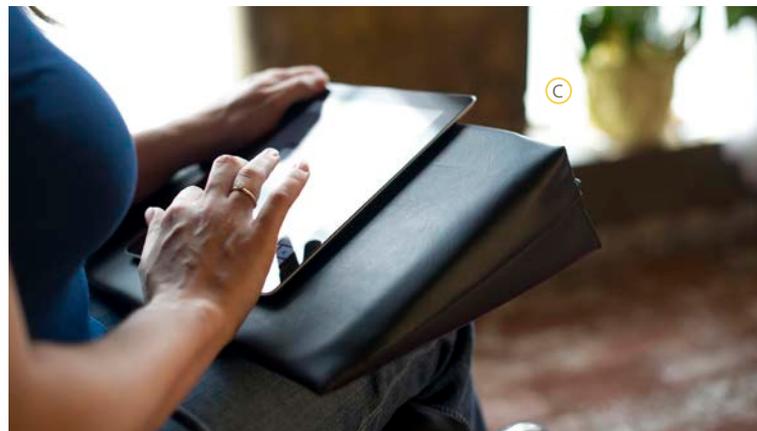

Enhance your independence!  
Non-slip but not sticky.  
Durable & easy to clean.

## Simplifying Daily Living

GRIP Solutions makes unique non-slip products designed to improve a variety of Activities of Daily Living (ADLs) by preventing items from slipping or sliding. What makes GRIP better? Unlike other non-slip products, GRIP material is not sticky – keeping items in place where you want them without the need for a bothersome adhesive! That means GRIP is more comfortable to use and tactile-friendly, plus it's easy to clean and lasts longer because it doesn't attract dust. And that's why GRIP is preferred by consumers and professionals alike!

## GRIP Solutions Difference

Unlike most non-slip products, the exclusive GRIP material is durable and easy to clean and disinfect. GRIP products can be cleaned quickly and thoroughly with dishwashing soap and water, disinfectant wipes, common household cleaning liquids, or even in the dishwasher! GRIP products make daily life easier by holding objects in place and can last for years, making them the smartest, most economical non-slip products on the market.

**GRIP Rolls**  
Most GRIP products are ready to use, right out of the package. For situations where you need a custom solution, the GRIP Roll is available to help you complete the job. The Roll can be cut to size and also sewn to your specifications to give you grip where you need it most. GRIP Rolls are available in Smooth or Pebble texture.

**A GRIP Lap Board**

The GRIP Lap Board is a unique non-slip device only available from GRIP Solutions. A stable platform with non-slip material on both sides, the Lap Board is ideal for transporting items such as hot foods, drinks, electronics, school & work materials, and many other items you may use while performing daily activities. Unlike other non-slip materials, GRIP is not a tacky surface, so the Lap Board will fit comfortably on your lap or can easily be carried by hand while keeping your items in place.

**B GRIP Activity Pad**

The GRIP Activity Pad is a flexible, non-slip mat that will keep items in place in just about any daily situation. Place on the table and secure your food preparation items in place, use on a tray to keep food items secure, and even place on your rollator to keep items from slipping or sliding while moving! The Activity Pad is the perfect, versatile non-slip solution to simplify your daily activities.

**C GRIP Wedge**

The GRIP Wedge keeps items like personal electronics held in place at an angle. The slanted, non-slip surface allows you to visualize, reach, and grasp items easily and fits comfortably on your lap or can be placed on a table. Another exclusively designed product only from GRIP Solutions, the Wedge will simplify many of your daily activities.

**D GRIP Transfer Pad**

The GRIP Transfer Pad allows you to safely and effectively transition from a sitting to standing position and vice versa. It works as a stable pivot point, securing feet in place when attempting to transfer.

**E Hand GRIP**

Simplify daily activities like brushing your teeth, combing your hair, and eating with a fork or spoon by using the Hand GRIP. Instead of cutting material and wrapping it around your hand to keep a utensil in place, the Hand GRIP comes out of the package ready to use and can be reused as you perform activities throughout the day.

**F Ex-R GRIP**

The Ex-R GRIP sets a new standard for dynamic hand exercise rehabilitation with its innovative design to improve and simplify therapy. Instead of cutting strips of non-slip material and wrapping around a patient's hand, the Ex-R GRIP is ready to use right out of the package to secure hands during therapy. With its universal design, the Ex-R GRIP can be fit on either the right or left hand for a wide range of hand sizes.

**G GRIP Footplate Pad**

The GRIP Footplate Pad will fit on most standard wheelchair footplates and keep your feet from sliding off, helping to prevent potential ankle and foot injuries. By keeping your feet firmly on the footplate, it will also help with your seating and posture.

**H Writing GRIP**

The Writing GRIP assists in holding a pen, pencil, stylus, or paintbrush so that you can easily perform daily work, school, or leisure activities.

**I Switch GRIP**

The Switch GRIP is another unique, non-slip product only available from GRIP Solutions. A flexible, moldable cushion creates a cocoon that will keep your remote controls, phone, and computer switches held in place.

**J Mini-GRIP**

Instead of buying separate products to open your bottles and jars, the Mini-GRIP is a universal opening device that allows you to easily take off lids to your beverage bottles, kitchen jars, and prescription containers. You'll be amazed at how many daily activities the Mini can simplify.

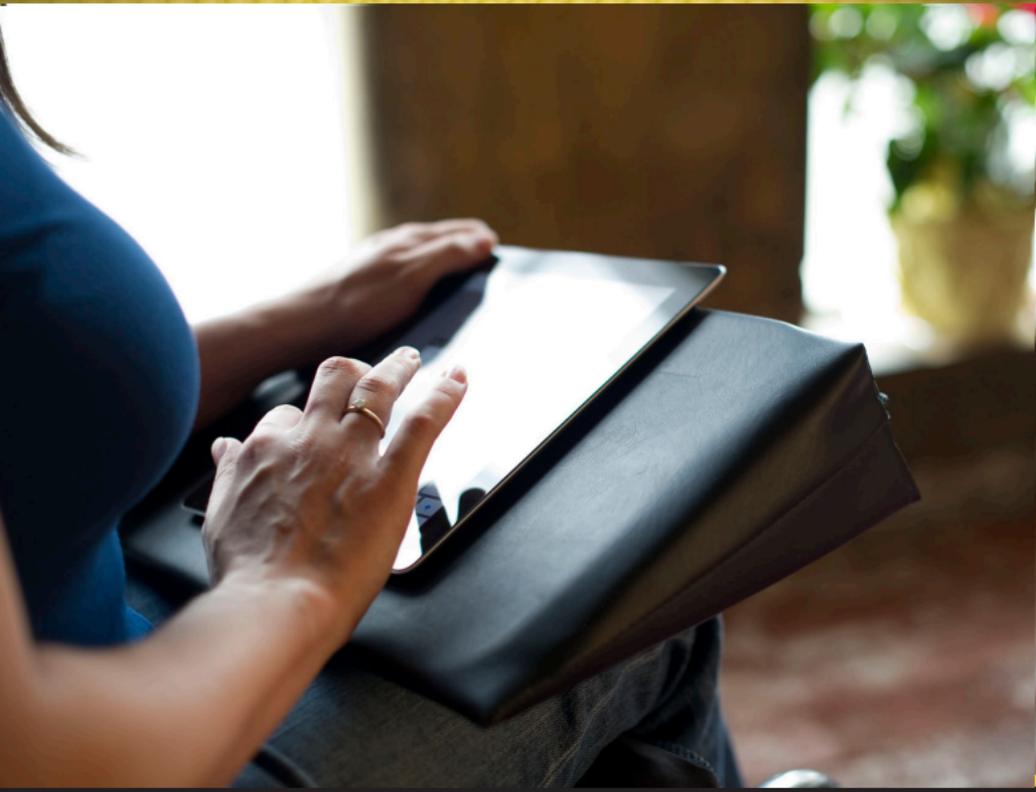

**K GRIP Seat**

The GRIP Seat is designed to improve posture and reduce slouching, while keeping you comfortably positioned in your seat. Place on your wheelchair seat cushion to improve stability, and prevent from sliding while you perform daily activities. Please use the GRIP Seat while adhering to standard seating position protocols.

**L GRIP Drink & Mug Holders**

For use on the Lap Board or Activity Pad, the GRIP Drink Holder and GRIP Mug Holder are designed to stabilize your drink to reduce tipping and spilling. Stabilize your coffee or tea in the Mug Holder. For your cold beverages, and even containers of yogurt and pudding, use the Drink Holder.
